

SILVER MOUNTAIN TARGETS

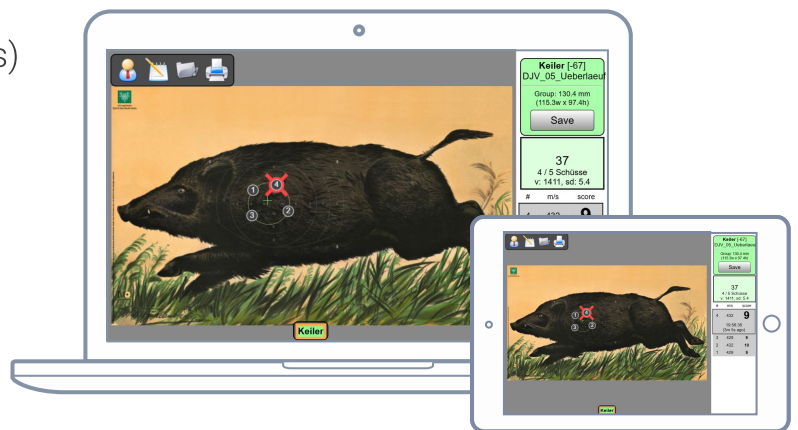

Display system BOAR

Electronic hit indication system
for running boar, double boar & knock-down boar

Developed and manufactured in Germany – in combination with the SPIETH sled, the SMT Keiler system stands for maximum precision, reliability, and user-friendliness. A complete electronic solution for displaying hits and ballistic data – specifically designed for supersonic calibers in hunting training.

- ▶ Hunting education (e.g. for novice hunters)
- ▶ Competition, instruction & training
- ▶ Display on tablet or PC (via browser)
- ▶ Compatible with SPIETH and other sled systems – including matching sensor mounts
- ▶ Automatic direction detection

- ▶ Battery operation possible (power bank tested up to 8 hours at 10 °C)
- ▶ WiFi connection between boar system and shooting line – wireless, stable & low-maintenance
- ▶ Dual sensors for precise sound measurement (accuracy approx. 6–8 mm)
- ▶ Optional server connection via S10/S25 & software module
- ▶ Rugged outdoor system (IP65): dust-, UV-, and splash-proof
- ▶ Optional: dual sled control, knock-down boar extension
