

SILVER MOUNTAIN TARGETS

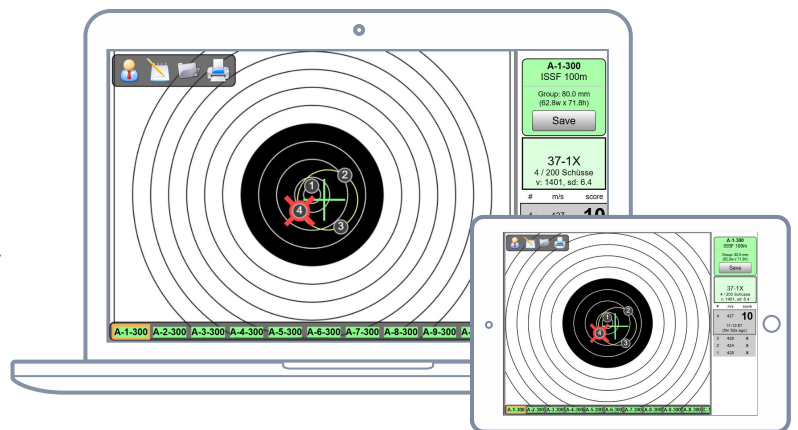

eTarget ProLine Permanent

Professional hit indication system for indoor shooting ranges & outdoor shooting ranges

The permanently installed ProLine series stands for a robust, low-maintenance, and cost-efficient system for precise electronic hit indication and ballistic data analysis for all common supersonic calibers and distances from 100 m to 2000 m.

Whether for education, training, or competition – the ProLine system offers clear advantages:

- ▶ Precise hit indication in real time
- ▶ Perfect support for range officers with central range control
- ▶ Compatible with existing target frames or knock-down targets
- ▶ No consumables needed except paper targets – minimal maintenance, maximum efficiency!

- ▶ IP68-compliant installation in weather-resistant control cabinets
- ▶ Integration into existing IT infrastructures possible
- ▶ Sensor installation outside of the shooting hazard zone (up to 3 m height)
- ▶ UV-resistant dual sensors (IP65), temperature range -20 °C to +55 °C
- ▶ Expandable with DIN-rail mounting, LAN/WLAN capable
- ▶ Wireless connection via WiFi (up to 300 m) or optionally via fiber optic/CAT 7
- ▶ Displays all ring, hunting, and polygon targets
