

SMT Shooters Pack 2

mobile electronic targets

Unique - Flexible - Multifunctional

- Can be used from 100m to 2000m indoor and outdoor over Wi-Fi connection
- Ideal for mobile use in outdoor – shooting ranges of any kind
- Independence by battery operation, fast simple construction
- Suitable for indoor and tunnel shooting
- Suitable for test and measuring lines, for example, Ammunition & Weapons Tests
- Display of projectile velocities (V_0), on intermediate distances
- Display of projectile velocity, shot groups, circles and hit coordinates
- Display of wind data and wind variations even with scope use
- Presentation of targets of all types such as ring animal army targets
- Easy setup and operation via mobile phone, TAB, notebook, panel pc, etc.
- Showing results in a browser (phone, TAB, Notebook)
- Save the results eg for subsequent evaluations etc.

Specs:

- 5 channel sound measurement method for all supersonic projectiles (large caliber)
- Measurement method over 5 sensors on the target
Data transmission via Wifi IEEE 802.11
- Power supply: use rechargeable batteries - mounting sensors on magnetic disks
- Display via standard browser for Firefox, Opera, Chrome, Internet Explorer, etc.
- Integration of WIS (Wind Information System (Optional) possible
- Integration further V_0 measurement points such as V_{10} , V_{100} , V_{200} , etc. possible
- Range up to 2000m (with repeater R5)
- Display / printout of hit point position, results & more ballistic data
